Title: Sales Performance Analysis & Forecast Report

---

1. Introduction

This report presents an analysis of the sales performance using an interactive Power BI dashboard. The objective is to understand overall business performance, identify key trends, and provide future sales forecasts based on historical data.

---

2. Overall Performance Analysis

The dashboard shows key performance indicators such as Total Sales, Total Orders, Total Profit, and Average Sales.

- The total sales achieved is approximately **$1.57M**.
- A total of **5901 orders** were recorded.
- The total profit generated is **$175K**, indicating positive business performance.
- The average sales value is **265.3 per order**.

☞ This indicates a stable and profitable business performance.

---

3. Sales Trend & Forecast

The sales trend over time shows a **consistent upward growth** with some fluctuations.

- Sales increased steadily from 2019 to 2021.
- A few dips were observed, but overall growth trend remains positive.

Forecast:

A forecast has been applied using Power BI's built-in forecasting feature.

- The future trend shows **continued growth in sales**.
- Sales are expected to increase in the upcoming months.

☞ This indicates strong business potential and growth opportunities.

---

4. Sales Rep Performance

Sales performance by customers (used as sales representatives) shows:

- Some customers contribute significantly higher sales compared to others.
- Top-performing customers generate the majority of revenue.

☞ This highlights the importance of focusing on high-value customers.

---

5. Product Performance

The product analysis shows:

- Certain products contribute the highest share of total sales.
- Top 10 products dominate the revenue contribution.

☞ This indicates that focusing on high-performing products can further increase sales.

---

6. Geographic Performance

Sales across regions show:

- **West region** has the highest sales contribution.
- Followed by East and Central regions.
- South region has the lowest sales.

☞ This suggests:

- Strong performance in West
- Growth opportunity in South region

---

7. Sales Funnel Analysis

The funnel chart represents sales distribution across segments:

- Consumer segment contributes the highest sales.
- Corporate and Home Office follow behind.

☞ This shows:

- Consumer market is the primary revenue driver
- Other segments can be improved for better balance

---

8. Key Insights

- Sales are steadily increasing over time.
- A small number of customers and products drive most of the revenue.
- West region is the strongest performing region.
- Consumer segment dominates the sales funnel.
- Future forecast shows positive growth trend.

---

9. Conclusion

The overall business performance is strong with consistent growth and profitability. The forecast indicates a positive future trend. By focusing on top-performing products, customers, and expanding in weaker regions, the business can achieve even higher growth.
